

Chapter 2

1. Saper, Scammell, and Lu (2005) Hypothalamic regulation of sleep and circadian rhythms, *Nature* 437: 1257-1263.
2. Nishino, Ripley, Overeem, Lammers, and Mignot (2000) Hypocretin (orexin) deficiency in human narcolepsy. *Lancet* 355: 39-40.
3. Nishino, Ripley, Overeem, Nevsimalova, Lammers, Vankova, Okun, Rogers, Brooks, and Mignot (2001) *Ann. Neurol* 50: 381-8.

Chapter 3

1. Thannickal, Moore, Nienhuis, Ramanathan, Gulyani, Aldrich, Cornford, and Siegel (2000) Reduced number of hypocretin neurons in human narcolepsy, *Neuron* 27: 469-74.
2. Peyron C, Faraco J, Rogers W, Ripley B, Overeem S, Charnay Y, et al. A mutation in a case of early onset narcolepsy and a generalized absence of hypocretin peptides in human narcoleptic brains. *Nat Med.* 2000 Sep;6(9):991-7.

Chapter 4

1. Aran A, Lin L, Nevsimalova S, Plazzi G, Hong SC, Weiner K, et al. Elevated anti-streptococcal antibodies in patients with recent narcolepsy onset. *Sleep.* 2009 Aug;32(8):979-83.
2. Han F, Lin L, Warby SC, Faraco J, Li J, Dong SX, et al. Narcolepsy onset is seasonal and increased following the 2009 H1N1 pandemic in China. *Ann Neurol.* 2011 Sep;70(3):410-7.
3. Nohynek H, Jokinen J, Partinen M, Vaarala O, Kirjavainen T, Sundman J, et al. AS03 adjuvanted AH1N1 vaccine associated with an abrupt increase in the incidence of childhood narcolepsy in Finland. *PLoS One.* 2012;7(3):e33536.
4. Juji T, Satake M, Honda Y, Doi Y. HLA antigens in Japanese patients with narcolepsy. All the patients were DR2 positive. *Tissue Antigens.* 1984 Nov;24(5):316-9.
5. Langdon N, Welsh KI, van Dam M, Vaughan RW, Parkes D. Genetic markers in narcolepsy. *Lancet.* 1984 Nov 24;2(8413):1178-80.
6. Neely S, Rosenberg R, Spire JP, Antel J, Arnason BG. HLA antigens in narcolepsy. *Neurology.* 1987 Dec;37(12):1858-60.
7. Ellis MC, Hetisimer AH, Ruddy DA, Hansen SL, Kronmal GS, McClelland E, et al. HLA class II haplotype and sequence analysis support a role for DQ in narcolepsy. *Immunogenetics.* 1997;46(5):410-7.
8. Mignot E, Hayduk R, Black J, Grumet FC, Guilleminault C. HLA DQB1*0602 is associated with cataplexy in 509 narcoleptic patients. *Sleep.* 1997 Nov;20(11):1012-20.

9. Tafti M, Hor H, Dauvilliers Y, Lammers GJ, Overeem S, Mayer G, et al. DQB1 locus alone explains most of the risk and protection in narcolepsy with cataplexy in Europe. *Sleep*. 2014 Jan;37(1):19-25.
10. Hallmayer J, Faraco J, Lin L, Hesselson S, Winkelmann J, Kawashima M, et al. Narcolepsy is strongly associated with the T-cell receptor alpha locus. *Nat Genet*. 2009 Jun;41(6):708-11.
