

### Chapter 1

1. Borbély AA, Achermann P. Sleep homeostasis and models of sleep regulation. *J Biol Rhythms*. 1999 Dec;14(6):557-68.
2. De Bodinat C, et al. Agomelatine, the first melatonergic antidepressant: discovery, characterization and development. *Nat Rev Drug Discov*. 2010 Aug;9(8):628-42.
3. Gerstner JR, Yin JC. Circadian rhythms and memory formation. *Nat Rev Neurosci*. 2010 Aug;11(8):577-88.
4. Blanco-Centurion C, Xu M, Murillo-Rodriguez E, Gerashchenko D, Shiromani AM, Salin-Pascual RJ, et al. Adenosine and sleep homeostasis in the Basal forebrain. *J Neurosci*. 2006 Aug 2;26(31):8092-100.

### Chapter 2

1. Moruzzi G, Magoun HW. Brain stem reticular formation and activation of the EEG. *Electroencephalogr Clin Neurophysiol*. 1949 Nov;1(4):455-73.

### Chapter 3

1. Saper CB, Chou TC, Scammell TE. The sleep switch: hypothalamic control of sleep and wakefulness. *Trends in Neurosciences*. 2001;24(12):726-31.
2. Lu J, Zhou TC, Saper CB. Identification of wake-active dopaminergic neurons in the ventral periaqueductal gray matter. *J Neurosci*. 2006 Jan 4;26(1):193-202.
3. Blanco-Centurion C, Gerashchenko D, Shiromani PJ. Effects of saporin-induced lesions of three arousal populations on daily levels of sleep and wake. *J Neurosci*. 2007 Dec 19;27(51):14041-8.
4. Chemelli RM, et al. Narcolepsy in orexin knockout mice: molecular genetics of sleep regulation. *Cell*. 1999 Aug 20;98(4):437-51.

### Chapter 4

1. Rechtschaffen A, Gilliland M, Bergmann B, Winter J. Physiological correlates of prolonged sleep deprivation in rats. *Science*. 1983 July 8, 1983;221(4606):182-4.
2. Banks S, Dinges DF. Behavioral and physiological consequences of sleep restriction. *J Clin Sleep Med*. 2007 Aug 15;3(5):519-28.
3. Pack AI, Pack AM, Rodgman E, Cucchiara A, Dinges DF, Schwab CW. Characteristics of crashes attributed to the driver having fallen asleep. *Accid Anal Prev*. 1995 Dec;27(6):769-75.

4. McCauley P, et al. A new mathematical model for the homeostatic effects of sleep loss on neurobehavioral performance. *J Theor Biol.* 2009 Jan 21;256(2):227-39.
5. Thomas M, et al. Neural basis of alertness and cognitive performance impairments during sleepiness. I. Effects of 24 h of sleep deprivation on waking human regional brain activity. *J Sleep Res.* 2000 Dec;9(4):335-52.

#### Chapter 5

1. Hobson JA, Pace-Schott EF. The cognitive neuroscience of sleep: neuronal systems, consciousness and learning. *Nat Rev Neurosci.* 2002 Sep;3(9):679-93.
2. Saper CB, Chou TC, Scammell TE. The sleep switch: hypothalamic control of sleep and wakefulness. *Trends in Neurosciences.* 2001;24(12):726-31.
3. Gaus SE, et al. Ventrolateral preoptic nucleus contains sleep-active, galaninergic neurons in multiple mammalian species. *Neuroscience.* 2002;115(1):285-94.
4. Hayaishi O. From Oxygenase to Sleep. *Journal of Biological Chemistry.* 2008 July 11, 2008;283(28):19165-75.

#### Chapter 6

1. Hobson JA, McCarley RW. The brain as a dream state generator: an activation-synthesis hypothesis of the dream process. *Am J Psychiatry.* 1977 Dec;134(12):1335-48.
2. Lu J, et al. Selective activation of the extended ventrolateral preoptic nucleus during rapid eye movement sleep. *J Neurosci.* 2002 Jun 1;22(11):4568-76.
3. Lu J, Sherman D, Devor M, Saper CB. A putative flip-flop switch for control of REM sleep. *Nature.* 2006 Jun 1;441(7093):589-94.
4. Vetrivelan R, et al. Medullary circuitry regulating rapid eye movement sleep and motor atonia. *J Neurosci.* 2009 Jul 22;29(29):9361-9.

#### Chapter 7

1. Stupfel M, Pavely A. Ultradian, circahoral and circadian structures in endothermic vertebrates and humans. *Comparative Biochemistry and Physiology Part A: Physiology.* 1990;96(1):1-11.
2. Mieda M, et al. Orexin peptides prevent cataplexy and improve wakefulness in an orexin neuron-ablated model of narcolepsy in mice. *Proc Natl Acad Sci U S A.* 2004 Mar 30;101(13):4649-54.
3. Lu J, Sherman D, Devor M, Saper CB. A putative flip-flop switch for control of REM sleep. *Nature.* 2006 Jun 1;441(7093):589-94.
4. Lin JS, et al. An inverse agonist of the histamine H(3) receptor improves wakefulness in narcolepsy: studies in orexin-/- mice and patients. *Neurobiol Dis.* 2008 Apr;30(1):74-83.
5. Zhu Y, et al. Selective loss of catecholaminergic wake active neurons in a murine sleep apnea model. *J Neurosci.* 2007 Sep 12;27(37):10060-71.
